BREEDING PROGRAM IN
NORTH AMERICA

AGRIPRO® WHEAT VARIETY

POSTROCK

AgriPro PostRock has proven to be one of the most consistent performing varieties available. Whether in a dryland situation where drought tolerance and disease protection is important or under irrigation where standability and yield potential are critical, PostRock comes out on top. All this and an excellent quality rating from the Wheat Quality Council.

Your best source of information on wheat varieties is your local AgriPro Associate. To find out more, call 877-WheatAP or visit AgriProWheat.com.

The Syngenta logo consists of the word 'syngenta' in a white, lowercase, sans-serif font. A green leaf icon is placed above the letter 'g'.

*AgriPro is a member of the
Syngenta family of seed companies*

PastRock

The Complete Package

Area of Primary Adaptation

- Superior straw strength
- Excellent yield & test weight
- Intermediate tan spot tolerance
- Holds dormancy in the spring
- Good aluminum tolerance

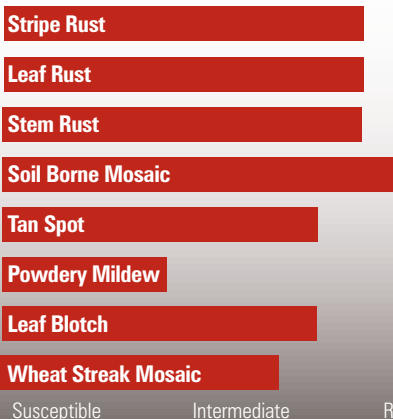

Features

Plant Height	Med. Semidwarf
Emergence	Average
Fall Cover	Average
Winter Survival	Good
Coleoptile	Medium
Straw Strength	Excellent
