

# TAM 203

AGRIPRO® VARIETY

THE NEW CHOICE FOR CENTRAL KANSAS

Superior genetics...locally grown™

## TAM 203

### New Genetics for Central Kansas

AgriPro TAM 203 offers producers new genetics with leaf and stripe rust resistance. It has performed well in the Southern Plains, where disease pressure has been high. TAM 203 is a good dryland wheat for Central Kansas due to its high yield potential, green leaf duration, aluminum soil tolerance and earlier maturity.

- Good quality grain
- Aluminum soil tolerance
- Withstands grazing well
- Tolerant to soil borne mosaic virus
- Medium-early maturity

AgriPro Southern Plains 2-yr Standard Variety Trial (bu./ac.)			
VARIETY	2006 Yield	2007 Yield	2-YR AVG.
