

AGRIPRO® WHEAT VARIETY

JACKPOT

Last Planted, First Harvested

Ideally suited for double-crop situations, Jackpot grows fast in the fall and starts early in the spring. It has excellent yield potential. Jackpot is early maturing with good test weights, excellent winterhardiness and good stripe rust tolerance. When leaf rust comes in early, producers can maximize yields with a fungicide treatment.

- Excellent yield potential
- High tillering
- Good choice for late planting
- Good fungicide responder
