

Superior Genetics

When it comes time to select wheat varieties for your operation, there's more to consider than this year's trial data. When you plant AgriPro®, you are planting proven, grower-tested varieties that come from a program that excels in overall performance in the field—day in, day out, year after year.

A Commitment to Quality Research

Developing the best wheat varieties available requires a long-term commitment to research and testing with a single goal—to make you, the grower, more profitable.

With 18 research locations and five demonstration sites spread across the Northern Plains, AgriPro has built the largest wheat breeding program in the nation.

Each year our research team, led by 30-year wheat breeding veteran Joe Smith, makes up to 1,000 cross combinations and generates 50,000 F5 progeny lines, developing the traits that will help take the industry to the next level of success.

2009 AgriPro Wheat Comparison Chart

Agronomics Disease and Pest Protection

	Test Wt.	Protein	Maturity	Height	Straw Strength	Stem Rust	Leaf Rust	Foliar Disease	Scab
AGRIPRO AP604 CL	2	3	2	7	5	1	6	4	6
AGRIPRO KUNTZ	3	5	4	5	2	1	4	4	5
AGRIPRO KELBY	2	2	2	4	2	1	2	4	4
AGRIPRO FREYR	3	3	4	7	4	2	4	4	3
AGRIPRO KNUDSON	3	4	4	6	3	2	3	2	5
Alsien	2	2	5	6	3	1	6	5	3
Ada	3	3	6	6	2	2	6	4	6
Briggs	3	2	2	7	7	2	3	4	6
Faller	3	5	6	8	7	1	1	3	3
Glenn	1	2	3	8	4	1	1	4	3
Howard	1	2	4	8	6	1	1	4	6
Oklee	2	2	3	6	7	1	6	6	5
RB07	3	2	2	6	4	1	2	4	5

Traverse	5	5	2	8	6	1	4	5	4

GENERAL:
 1 = Excellent
 2 = Very Good to excellent
 3 = Very Good
 4 = Very Good to Good
 5 = Good
 6 = Fair to Good
 7 = Fair
 8 = Fair to Poor
 9 = Poor

Maturity:
 1 = Earliest
 9 = Latest

Height:
 1 = Shortest
 9 = Tallest

Protein Content:
 1 = Highest
 9 = Lowest

These agronomic assessments are made by AgriPro scientists and reflect each variety's relative performance within these characteristics prior to and during the 1999-08 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations. These have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

2009 SEED GUIDE & COMPARISON CHART

Northern Plains

The Largest Wheat Breeding Program in North America

The AgriPro® Associate Network

The key to harvesting the benefits of AgriPro's industry-leading varieties is your local AgriPro Associate. He is a professional seedsman who can provide the knowledge and local experience to help you select the right mix of AgriPro varieties to reduce risk and add to your bottom line.

As a member of the AgriPro Associate Network, he tests, grows and conditions AgriPro varieties under the same conditions you face on your farm, and is backed by the largest wheat research program in the nation.

Call your local AgriPro Associate today, or visit AgriProWheat.com, to find out more about the full line of AgriPro varieties specifically developed for the Northern Plains.

AgriProWheat.com

866-Yield-AP

866-943-5327

**Developing wheat varieties
for the Northern Plains
for more than 30 years**

PVPA 1994 – Unauthorized propagation prohibited. Plant variety protection granted or applied for AgriPro varieties.

Kuntz

The Yielder That Stands

Kuntz provides AgriPro's best yield potential and straw strength for the Northern Plains, but don't overlook Kuntz's superior agronomics.

AP604 CL

CLEARFIELD*
production system | wheat

CLEARFIELD* Production System

Get control of nearly every grass and broadleaf weed, including volunteer cereals, with AP604 CL. A superior, herbicide-tolerant variety with high yield potential.

Knudson

High Yield — Broad Adaptation

The standard for yield performance and disease resistance across the Northern Plains. When yield is king, Knudson is hard to beat.

Syngenta Seed Care Products

Protect your AgriPro seed investment and enhance your earning potential with Syngenta Seed Care products. For more information, contact your local ag products dealer, Syngenta Seed Care Specialist Jay Stroh at 218-826-6380 or visit SyngentaSeedTreatment.com

*CLEARFIELD is a trademark of BASF. ©2002 BASF Corporation. All rights reserved. Always read and follow label directions. CruiserMaxx® Cereals, and Seed Care™ are trademarks of a Syngenta Group Company. Cruiser insecticide is protected by several pending patent applications and granted patents in the U.S. and worldwide including U.S. Patent Nos. 5852012 and 6844339. PVPA 1994—Unauthorized propagation prohibited. Plant variety protection granted or applied for AgriPro varieties, including Kelby, Freyr, Knudson, AP603 CL, Hawken, AP604 CL, Norpro, Hanna, Kuntz, Ivan, Lars, Nora, Gunner, Jagalene, AP502 CL, AP503 CL², NuFrontier and NuHorizon.

Kelby

The Complete Agronomic Variety

Reduce your risk with a variety that does it all. No other variety offers such a complete package of disease tolerance, quality and agronomics.

Freyr

Performance Under Pressure

Freyr has proven its consistency and yield across North and South Dakota, Minnesota and Montana. Challenged by disease, scab, drought and tough conditions, Freyr gets the job done.

Hawken

High Performance Winter Wheat

If you plant winter wheat, you want the same agronomic qualities you expect from your spring wheat—disease resistance, short height and straw strength. AgriPro Hawken—no compromises.

*AgriPro is a member of the
Syngenta family of seed companies*
