

2009 AgriPro Wheat Comparison Chart

GENERAL:

- 1 = Excellent
- 2 = Very Good to excellent
- 3 = Very Good
- 4 = Very Good to Good
- 5 = Good
- 6 = Fair to Good
- 7 = Fair
- 8 = Fair to Poor
- 9 = Poor

Maturity:

- 1 = Earliest
- 9 = Latest

Height:

- 1 = Shortest
- 9 = Tallest

Protein Content:

- 1 = Highest
- 9 = Lowest

PVP PVPA 1994 – Unauthorized propagation prohibited. Plant variety protection granted or applied for AgriPro varieties.

These agronomic assessments are made by AgriPro scientists and reflect each variety's relative performance within these characteristics prior to and during the 1999-08 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations. These have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.
