

2010 AgriPro Wheat Comparison Chart

Agronomics

Disease and Pest Protection

	Test Wt.	Protein	Maturity	Height	Straw Strength	Stem Rust	Leaf Rust	Foliar Disease	Scab
AP604 CL	2	3	2	7	5	1	6	4	6
BRENNAN	2	3	2	4	2	2	3	4	4
JENNA	3	3	6	5	2	2	3	3	5
KELBY	2	2	2	4	2	1	2	4	4
KUNTZ	3	5	4	5	2	1	4	4	5
FREYR	3	3	4	7	4	2	4	4	3
KNUDSON	3	4	4	6	3	2	3	2	5
Briggs	3	2	2	7	7	2	3	4	6
Faller	3	5	6	8	7	1	1	3	3
Glenn	1	2	3	8	4	1	1	4	3
Howard	1	2	4	8	6	1	1	4	6
Oklee	2	2	3	6	7	1	6	6	5
RB07	3	2	2	6	4	1	2	4	5
Steele ND	2	2	4	8	7	1	2	4	6
Traverse	5	5	2	8	6	1	4	5	4

GENERAL:

1 = Excellent
 2 = Very Good to excellent
 3 = Very Good
 4 = Very Good to Good
 5 = Good
 6 = Fair to Good
 7 = Fair
 8 = Fair to Poor
 9 = Poor

Maturity:

1 = Earliest
 9 = Latest

Height:

1 = Shortest
 9 = Tallest

Protein Content:

1 = Highest
 9 = Lowest

These agronomic assessments are made by AgriPro scientists and reflect each variety's relative performance within these characteristics prior to and during the 2006-09 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations. These have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

2010

NORTHERN PLAINS VARIETY COMPARISON CHART

Superior Genetics

When it comes time to select wheat varieties for your operation, there's more to consider than this year's trial data. When you plant AgriPro®, you are planting proven, grower-tested varieties that come from a program that excels in overall performance in the field—day in, day out, year after year.

A Commitment to Quality Research

Developing the best wheat varieties available requires a long-term commitment to research and testing with a single goal—*to make you, the grower, more profitable.*

With 18 research locations and five demonstration sites spread across the Northern Plains, AgriPro has built the largest wheat breeding program in the nation.

Each year our research team, led by 30-year wheat breeding veteran Joe Smith, makes up to 1,000 cross combinations and generates 50,000 F5 progeny lines, developing the traits that will help take the industry to the next level of success.

Your best source of information on wheat varieties is your local AgriPro Associate. To find out more, visit AgriPro.com/northernplains.

Bringing plant potential to life
